Administration: Suite B  
(707) 463-1859  
Transportation Planning: Suite G  
(707) 234-3434

September 28, 2022

**To:** MCOG Board of Directors  
**From:** Janet Orth, Deputy Director / CFO  
**Subject:** Information Packet of October 3, 2022 Meeting - No Action Required

\* \* \* \* \*

The following items are attached.

1. Clean California Community Day Survey – Caltrans invites participation in a survey, open until October 7, in both English and Spanish.
2. Caltrans Project Updates and Milestones – September summaries of highway and bridge projects in Mendocino County and District 1.
3. MCOG Technical Advisory Committee (TAC) – Meeting minutes of May 18, 2022.

# Community Day

MARCH INTO ACTION

Caltrans invites you to participate in a survey to help drive the activities and outcomes of the Clean California *Community Day*. Please take three minutes to respond to the survey, then stay tuned for more updates as the Community Day approaches.

The impact of litter is widespread across California. The responsibility is on each of us to take action. The Clean California Community Day will unite Californians to create new habits that reflect pride, educate on proper trash disposal and environmental impacts, increase public safety and health, and will improve California one community at a time.

Click here to take the survey, available in [English](#) and [Spanish](#). The survey will be available until October 7, 2022.

Launched by Governor Newsom as part of his California Comeback Plan, Clean California invests \$1.1 billion for state and local governments to clean up trash and debris statewide, beautify community gateways and public areas along highways, streets and roads and provide good jobs to thousands of Californians. Over three years, Clean California will remove an additional 1.2 million cubic yards, or 21,000 tons, of trash from the state system alone — enough to fill the Rose Bowl three times over.

## Project Updates

### **South DEAL**

**September 2022**

#### MENDOCINO COUNTY

**MEN-1-PM 0.63/0.99 – Gualala Streetscape Enhancement Project** – The purpose of this project is to improve traffic flow and create safe and comfortable facilities for pedestrian and bicycle travel downtown. The project is also intended to improve Gualala’s visual character by incorporating landscape and hardscape features into the project. MCOG will be submitting an ATP grant application to the CTC to fully fund this project. If selected for funding, the project would be scheduled to begin construction in 2026.

**MEN-1-PM 6.50/9.50 – Widen Shoulders** – This project proposes to improve shoulder width along two curves on Highway 1. The project is split into two sections, post mile (PM) 6.55 to 6.75 and PM 9.30 to 9.45. The project elements include shoulder widening and metal beam guard rail (MBGR) wall. The project proposes to provide 4-foot shoulders in both the northbound and southbound directions. The project will also include a superelevation improvement. Construction is targeted to begin in summer 2024. The current estimated capital cost of the project including mitigation is approximately \$5 million.

**MEN-1-PM 31.35 – Elk Creek Bridge** – The scope of the current programmed project for rail replacement has been revised to a bridge improvement project with an alternative for bridge replacement to address scour concerns. This project is targeted to begin construction in fall 2023.

**MEN-1-PM 33.70/R51.00 – Elk to Mendocino CAPM** – This \$22.5 million SHOPP pavement project proposes to restore and preserve the drivability and serviceability of Route 1 PM 33.70 to R51.00. Project Approval and environmental clearance was met in December 2021, the project is currently in the design phase, and construction is targeted to begin in spring 2024.

**MEN-1-PM 42.44/43.20 – Navarro Ridge Safety** – This shoulder widening project proposes to widen existing shoulders in both directions to 4 ft., install edge-line rumble strip, perpetuate the existing centerline rumble strip, and install metal beam guardrail. Work will include replacement of four culverts, nine drainage inlets and the extension of three culverts. The project was initiated by District 1 Traffic Safety Office in response to a high incidence of run-off-road collisions. The construction capital estimate is \$3.75 million. Construction is now scheduled for summer 2023 due to the local CDP being appealed by the Albion Bridge Stewards to the California Coastal Commission. Coastal Commission staff anticipates the appeal will be on the Commission’s November Meeting Agenda.

**MEN-1-PM 42.30/42.50 – Navarro Drainage** – The scope of this project is to abandon the existing culvert and to install a new 36-inch diameter culvert. The culvert inlet will remain at the same place and the outlet will be relocated approximately 30 ft. to the south for better alignment with natural channel. A 20 ft. by 9 ft. rock energy dissipater will be installed at the outlet. The roadway embankment side-slopes and the embankment of a private driveway will be repaired and revegetated. Shoulders will be widened to 4 ft. Additional items include restriping, installation of the edge-line and centerline rumble strip & dike replacement. The construction capital estimate is \$1.9 million. Construction is scheduled for summer 2023 due to the local CDP being appealed by the Albion Bridge Stewards to the California Coastal Commission. Coastal Commission staff anticipates the appeal will be on the Commission's November Meeting Agenda.

**MEN-1-PM 42.4/43.3 – Salmon Creek Bridge** – This project proposes to improve the structural and geometric deficiencies of the bridge and approach roadways to ensure uninterrupted traffic movements in the event of an accident, seismic event, or other catastrophic failure; significantly reduce ongoing maintenance costs; provide wider shoulders for motorists experiencing breakdowns and provide safe bicycle and pedestrian movement across Salmon Creek. The District has programmed a separate sandblast waste-abatement project to address the lead impacted soils caused by sand blast waste created from past bridge maintenance activities. The lead abatement project is anticipated to begin construction in 2024. The current construction capital estimate for the bridge replacement project is \$33.3 million.

**MEN-1-PM 43.3/44.2 – Albion River Bridge Maintenance** – The purpose of this maintenance project is to preserve the structural integrity, extend the life of the Albion River Bridge and to prevent further degradation of the existing wooden structure by repairing horizontal timber members that have areas of decay, replacing approximately 1,100 bolted connections throughout the entire timber sub-structure and removing the rusted and failed utility conduit along the right side of the bridge. Phase 1 has been completed and Phase II is expected to go to construction in fall 2022. A follow up maintenance project is planned for spring 2022 to repair 53 timber scabs and inspect three split ring connectors and one mole claw plate.

**MEN-1-PM 43.3/44.2 – Albion River Bridge** – This project proposes to improve function, geometrics and the seismic and structural integrity of the Albion River Bridge and approach roadway to ensure uninterrupted traffic movement in the event of a collision or emergency incident, seismic event or other catastrophic failure, significantly reduce ongoing maintenance costs, provide wider shoulders for motorists experiencing breakdowns and provide safe access for pedestrians and bicyclists across the bridge. The initial geotechnical investigations have been completed. Additional drilling for the geotechnical investigation will occur in the next phase of the project following the selection of a preferred alternative. Environmental clearance was expected by August 2022 but is now delayed until August 2024, due to a change in environmental document type. Although construction is scheduled to begin in summer 2027, local opposition to the project may delay begin construction. The construction capital estimate is \$53.4 million.

**MEN-1-PM 51.45 – Jack Peters Bridge Widening & Rail Upgrade** – The purpose of these projects is to improve function by increasing bridge shoulder width for bicyclists and to ensure uninterrupted traffic movement in the event of a collision or emergency incident, construct separated pedestrian walkways on both sides of the structure to provide safe access for pedestrians and upgrade bridge rails to meet current design standards. Environmental clearance was completed in February of 2022. Construction on the Jack Peters Creek Bridge is scheduled to begin construction summer 2023.

**MEN-1-PM 59.70 – Hare Creek Bridge** – The purpose of this project is to improve function by increasing bridge shoulder width for bicyclists and to ensure uninterrupted traffic movement in the event of a collision or emergency incident, construct separated pedestrian walkways on both sides of the structure to provide safe access for pedestrians and upgrade bridge rails to meet current design standards. Construction is targeted for Spring 2025. The construction capital estimate is \$10.1 million.

**MEN-1-PM 59.8/62.1 – Fort Bragg ADA** – This \$6.1 million project proposes to replace/install curb ramps, sidewalks, driveways, and crosswalk pavement markings in the community of Fort Bragg. The Local Coastal Development Permit was submitted on 6/17/22. We are working with the City of Fort Bragg to obtain LCDP approval. Project is on the October 2022 CTC Agenda. If approved, construction is scheduled to begin in 2023.

**MEN-1-PM 61.99 – Pudding Creek Bridge Widening & Rail Upgrade** – The purpose of these projects is to improve function by increasing bridge shoulder width for bicyclists and to ensure uninterrupted traffic movement in the event of a collision or emergency incident, construct separated pedestrian walkways on both sides of the structure to provide safe access for pedestrians and upgrade bridge rails to meet current design standards. The contract is out to bid and work on the Pudding Creek Bridge is scheduled to begin fall 2022.

**MEN-1-PM 65.13/65.49 – Men-1 Widen Shoulders** – The purpose of this \$2.1 million safety project is to reduce the frequency and severity of collisions by widening the shoulders near Nameless Rd. Widening will require drainage improvements. Environmental clearance was met on December 30, 2020. Construction is scheduled for summer 2023.

**MEN-1-PM 87.90/105.60 – Rockport to Leggett CAPM** – This \$22.2 million SB1 pavement project proposes to restore and preserve the drivability and serviceability of Route 1 PM 87.90 to 105.60. The project is in the design phase and should begin construction in 2023.

**MEN-20-PM 19.1/20.3 – James Creek East & West Safety** – The purpose of this \$2.9 million safety project is to reduce the frequency and severity of collisions with geometric improvements. The contract was awarded to Granite Construction. Construction started in June and is scheduled to go through 2023.

**MEN-20-PM 33.4/34.2 – Calpella 2 Bridge Replacements** – This \$32.4 million project, just east of Highway 101, proposes to replace the two bridges that span the Russian River, the railroad, and East Side Road in Redwood Valley. The project will also make improvements to Road 144 (connector from Highway 20 to East Road) intersection. Bridge construction will be off alignment to reduce impacts to local communities and Highway 20 and 101. The construction contract has been awarded to MCM Construction, Inc. Construction has begun and should be completed in 2025.

**MEN-101-PM 1.4/1.7 – Comminsky Permanent Restoration** – This \$7.4 million project proposes to construct a wall to restore the roadway to pre-storm damage conditions and reduce the risk of future damage. This project is currently out to bid. Bid Opening is scheduled for 8/30/2022. Construction is planned for the 2022 season.

**MEN-101-PM 3.7 & 5.3 – Peregrine Slides** – This \$13.8 million storm damage restoration project is expected to stabilize substantial landslide areas and repair the damaged four lane highway. The project includes construction of retaining walls, drainage, and roadway reconstruction. Major elements of construction were completed in 2021 with the remaining items to be completed in 2022.

**MEN-101-PM R9.5/10.8 – La Franchi Left Turn Pocket** – This is a new safety project initiated in response to a number of collisions occurring in this segment from Hopland Overhead to Feliz Creek Bridge. This project proposes to construct a northbound left turn lane at La Franchi Road, realign the La Franchi Road intersection to a 90-degree angle, widen shoulders to 8 feet, construct a southbound left turn lane at a commercial driveway (PM 10.6), and add centerline rumble strip. Project is in the Environmental phase. Construction is planned for summer 2026.

**MEN- 101-PM 9.9/11.2 – Hopland ADA** – This \$11 million project proposes to correct non-compliant ADA pedestrian features, rehabilitate pavement, and add traffic calming/complete streets features in the community of Hopland. Project Approval has been completed. Design will start in Sept. 2022 and the project is targeted to begin construction in 2025.

**MEN-101-PM R21.00/R28.60 – Ukiah Rehab** – This \$45.810 million SB1 pavement rehabilitation project proposes to restore and preserve the drivability and serviceability of Route 101 PM R21.00 to R28.60. Project Approval phase is complete and design phase has begun. Targeted to begin construction in 2025.

**MEN-101-PM 30.8/R33.8 – Calpella Cable Median Barrier** – This \$6.3 million safety project proposes to install High Tension Cable Barrier within the median of Route 101 PM 30.8 to R33.8. The project is in the Design phase and targeted to begin construction in 2023.

**MEN-101-PM R33.73/R43.20 – Ridgewood Class 1 Pavement** – This \$40.5 million SB1 pavement rehabilitation project proposes to restore and preserve the drivability and serviceability of Route 101 PM R33.73 to R43.20. The project received Project Approval and is now in the design phase. The project is targeted to begin construction in 2023.

**MEN-101-PM 41.2/R42.8 – South Willits Median** – This \$10.8 million safety project proposes to install High Tension Cable Barrier within the median of Route 101 PM 41.2 to R42.8. The project is in the Project Approval phase and targeted to begin construction in 2024.

**MEN-101-PM 43.5/51.30 – Willits Bypass Mitigation Project** – This project will mitigate the wetland, riparian, and oak woodland impacts resulting from constructing Phase 1 of the Willits Bypass. Completed work includes seven acres of wetland creation and erosion control repairs; fencing for rotational grazing and wetland/riparian corridor protection; project water supply infrastructure; and service contracts for seed collection and plant propagation. The initial planting and establishment is complete. The project will continue to be monitored per the MMPs (Mitigation Monitoring Plans) until 2028.

**MEN-101-PM 48.96/55.06 – Oilwell Class 1 Pavement** – This \$8.7 million SB1 pavement rehabilitation project proposes to restore and preserve the drivability and serviceability of Route 101 PM R33.73 to R43.20. The project received Project Approval in fall of 2021 and is now in the design phase. The project is targeted to begin construction in 2024.

**MEN-101-PM 50.7/52.2 – Oilwell Hill Safety** – This is a safety project initiated in response to a number of collisions occurring in this segment from Outlet Creek Bridge to 0.4 mile north of Ryan Creek Road. This project proposes to widen the roadway to add a 10-foot median and place a concrete median barrier where three fatal crossover collisions have occurred. The project will also add the placement of High Friction Surface Treatment and upgrade guardrail. Environmental studies have started and construction is scheduled for 2025.

**MEN-101-PM 55.0/64.9 – Longvale Rehab** – This \$26.9 million project near Willits, from 0.5 mile south of Shimmins Ridge Road to north of Old Sherwood Road, proposes to rehabilitate roadway, upgrade guardrail, and add Transportation Management System (TMS) elements. This project is in the Environmental phase and is on schedule to begin construction in the 2024 season.

**MEN-101-PM 58.9/82.5 – Moss Cove, Irvine Lodge, & Empire Camp SRRA's** – This \$12.3 million project will upgrade 3 rest areas along Highway 101 in Northern Mendocino County. The contract has been awarded to West Coast Contractors and is in construction. Work at Moss Cove is complete, and the rest area was opened to the public on 5/31/2022. Empire Camp SRRA has been reopened and Irvine Lodge Rest Area is now closed. Work at that location is estimated to be completed by November 2022.

**MEN-162- PM 0/25.7 – Covelo Pavement** – This \$36.1 million pavement project proposes to rehabilitate 50.73 miles of pavement, upgrade signs, and update guardrail. Project Approval was achieved in June and the project is targeted to begin construction in 2024.

**MEN-162-PM 8.2 – South Fork Eel River Bridge Seismic** – This bridge has been identified as being seismically vulnerable and needing bridge rail upgrade. A bridge replacement alternative has been selected by the project team. This \$12.3 million project reached environmental clearance on 12/15/20. Construction to begin in the 2023 season.

**MEN-162-PM 11.5/11.8 – Rodeo Creek Slide II** – This \$38 million permanent restoration project proposes to construct a wall to restore the roadway to pre-storm damage conditions and reduce the risk of future damage. The construction contract was awarded to Mercer-Fraser Company and is currently in construction and is on schedule to be completed in 2024.

**MEN-162-PM 29.18/30.67 – Covelo Trail Project** – This trail project proposes to construct a Class I separated multi-use trail parallel to Highway 162 just north of the community of Covelo. The project is being administered by the Mendocino Council of Governments with oversight provided by Caltrans. Construction is expected in 2023.

**MEN-253-PM 1.7/2.5 – Soda Creek Wall** – This \$20.6 million permanent restoration project proposes to construct a wall to restore the roadway to pre-storm damage conditions and reduce the risk of future damage. Project Approval was met on 3/1/22 and is now in the design phase. Construction is scheduled to begin in the 2023 season.

**MEN-271-PM 19.6/20.0 – McCoy Creek Sinks** – This \$4.2 million Permanent Restoration project proposes to construct a wall to restore the roadway to pre-storm damage conditions and reduce the risk of future damage. This project was awarded to Granite Construction and should begin work this season. Construction is on schedule to be completed in 2024.

**HUM/MEN-VAR-PM VAR – Hum-101/Men-271 Culverts** – This is a \$2.8 million project that proposes to rehabilitate or replace 14 drainage systems along Hwy 101 in Humboldt County and on Route 271 near Piercy, from Bear Pen Road to 0.5 mile north of Route 101 Separation in Mendocino County. The project is currently in the award process and the apparent low bidder is Wylatti Resource Management. Construction started this summer.

## **LAKE COUNTY**

**LAK-VARIOUS – Morrison, Robinson and Kelsey Creek Bridge Widening and Replacement** – This \$8.6 million project proposes to widen Morrison (Highway 20) and Robinson Creek Bridges (Highway 29) and replace Kelsey Creek Bridge (Highway 175). The project started construction and is expected to be completed in late 2023.

**LAK-20-PM 2.0/2.8 – Blue Lakes Safety Project** – This \$15.7 million safety project on Highway 20, adjacent to Blue Lakes, proposes to widen shoulders, improve the horizontal curve, and to construct a sight bench. Environmental clearance was completed on 9/22/20. Project is in design and construction is expected to begin in summer 2023.

**LAK-20-PM 5.10/6.0 – Witter Springs Safety Combined** – This \$8.91 million construction capital project is the combined construction project for the Lake 20 Shoulders and Bachelor Creek Bridge Rehabilitation projects. Construction occurred through 2021 and is expected to be completed during the 2022 season.

**LAK-29-PM 4.15/5.14 – Middletown Multi-Use Path** – This project proposes a Class I multi-use trail parallel to Highway 29 on the west side, from Rancheria Road to Central Park Road. The project is administered by the County of Lake with oversight provided by Caltrans. Construction is scheduled to begin this fall.

**LAK-29-PM 17.6/18.0 – Lake 29/C Street Left Turn Channelization** – This is a safety project initiated in response to a number of collisions occurring at this intersection. This project proposes to provide left turn channelization for northbound traffic on Highway 29 turning onto C Street and provide refuge for eastbound traffic on C Street turning onto northbound Highway 29. Environmental studies are beginning and construction is scheduled for 2026.

**LAK-29-PM 23.8/31.6 – Lake 29 Expressway** – The scope of this project is to replace 8 miles of existing 2-lane conventional highway with new 4-lane divided expressway on a new alignment. The environmental document was completed in 2016 and covers the entire 8-mile project; however, the project will be constructed in three phases (segments) depending on availability of funding. The first phase (segment 2C = 28.5/31.6) of the project is under construction. The \$53.6 million construction contract was awarded to OC Jones & Sons in November 2019. Design work on the remaining two phases began in July 2018 and has continued to date; however, construction and right of way funds have not been secured.

**LAK-29-PM 34.9/35.23 – Kelsey Creek Road Left Turn Channelization** – This \$2.9 million safety project proposes to widen the roadway and provide a left turn lane and acceleration lane for Kelsey Creek Road. Final design is complete and the construction contract has been awarded and construction has started.

**LAK/MEN-VARIOUS – Lake/MEN County Traffic Management System (TMS) Projects** – Combined two traffic management system projects propose to create a backbone wireless communication system in Lake County to improve the current capacity in order to provide accurate and timely data for traffic and travel conditions; including the installation of Changeable Message Signs to notify the public during emergency conditions. The total construction cost is \$4.4 million. Project is in construction and scheduled to be completed 12/2023.

## MINUTES

### MENDOCINO COUNCIL OF GOVERNMENTS TECHNICAL ADVISORY COMMITTEE

*Meeting Held Remotely via Zoom Meeting/Teleconference*

May 18, 2022

#### **Members Present**

Tim Eriksen, City of Ukiah  
Jeremy Ronco (*for Dusty Duley*), City of Willits  
Paul Andersen, City of Point Arena  
Chantell O’Neal, City of Fort Bragg  
Alicia Meier, County DOT  
Mark Cliser, Co. DPBS  
Dean Meester, Caltrans

#### **Staff & Others Present**

Nephele Barrett, MCOG Administration  
Loretta Ellard, MCOG Planning  
Jesus Rodriguez, MCOG Planning  
Alexis Pedrotti, MCOG Planning  
Danielle Casey, MCOG Administration  
Kyle Finger, Caltrans  
Andrea Trincado, City of Willits  
Lucy Bartholomew, Blue Zones  
Joaquin Wright, GHD

#### **Members Absent**

AQMD Representative  
Jacob King, MTA

1. **Call to Order/Introductions** – Nephele called the meeting to order at approx. 10:03 a.m. Individuals present were identified.

2. **Public Expression** – None.

3. **Input from Native American Tribal Governments’ Representatives** – No tribal representatives were present.

4. **Approval of Minutes of 3/16/22** – Motion by Tim Eriksen, seconded by Paul Andersen, and carried unanimously on roll call vote (7 ayes – Eriksen, Ronco, Andersen, O’Neal, Meier, Cliser, Meester), to approve the minutes of 3/16/22.

5. **Presentation on CalRecycle’s Tire Derived Aggregate (TDA) Program** – Joaquin Wright, GHD, presented a short video on “Tire Derived Aggregate – a Sustainable Road Repair Solution” and summarized CalRecycle’s TDA grant program which uses recycled tires (tire derived aggregate) in sustainable road repairs. He reviewed eligible grant project categories: lightweight fill – slope stabilization; embankment fill; road repair walls; vibration mitigation – under light rail lines; low impact development (LID)/storm water management; and aggregate replacement projects in landfills. Eligible reimbursement costs include: TDA material, transportation, installation, geotextile materials related to TDA, engineering, and design work. Project requirements include: 100% CA-generated waste tires; minimum 500 tons of TDA material (200 tons for LID projects); plans and specifications are subject to review by CalRecycle, and technical assistance and training is provided.

Joaquin advised the maximum TDA grant is \$350,000, grants are reimbursable, and the project period is 24 months from the notice to proceed. The next grant cycles will be in August 2022 and January 2023.

A brief discussion ensued, with Joaquin responding to various questions. He invited TAC members to contact him with questions ([joaquin.wright@ghd.com](mailto:joaquin.wright@ghd.com)). More information is available at [www.calrecycle.ca.gov/Tires/Grants/TDA](http://www.calrecycle.ca.gov/Tires/Grants/TDA). Nephele thanked him for the informational presentation.

**6. Final FY 2022/23 Overall Work Program** – Lexi reviewed her staff report and gave a brief overview of the proposed Final FY 2022/23 OWP, totaling \$1,046,598. She noted the Final OWP emailed to TAC members yesterday included revised financial sheets to show the programming of the \$150,000 “project reserve” to new work element 3 “MTA Feasibility Study for Ukiah Transit Center”. She summarized revisions made since the draft OWP was reviewed. The proposed Final Overall Work Program includes projects recommended by the TAC in the Draft as well as carryover projects, and addresses the minor comments received from Caltrans. She also noted that carryover amounts will be adjusted in the first amendment after the fiscal year ends.

**Motion by Tim Eriksen, seconded by Jeremy Ronco, and carried unanimously on roll call vote (7 ayes – Eriksen, Ronco, Andersen, O’Neal, Meier, Cliser, Meester) to recommend that MCOG approve the Final FY 2022/23 Overall Work Program.**

**7. Staff Reports**

7a. Highway Safety Improvement Program (HSIP) Cycle 11 – Applications due 9/12/22 – Nephele reviewed the staff report and advised the Cycle 11 call for projects has been released. She noted TJKM will be developing two applications per agency as part of the Local Road Safety Plans project, and applications are due 9/12/22.

Nephele pointed out that the “funding set-aside” categories do not have benefit cost ratio (BCR) requirements, and this would be a good opportunity for local agencies to submit applications (separate from the applications TJKM is preparing). She also noted the set-asides are often under-subscribed, and agencies not funded in the last round have priority. Set-aside categories include: Guardrail Upgrades; Pedestrian Crossing Enhancements, Installing Edgelines, Bike Safety Improvements, and Tribes.

For the BCR category, Loretta advised that a minimum BCR of 3.5 has been identified for this cycle. She encouraged members to click on the links in the staff report for guidelines and instructions.

Alicia mentioned an HSIP webinar on May 25, and Loretta offered to forward the webinar announcement to members.

7b. Active Transportation Program (ATP) – Applications due 6/15/22 – Nephele advised there is currently an open call for projects for the ATP program, with applications due 6/15/22. She reported MCOG is working with Caltrans on an application for construction funding for the Gualala Downtown Streetscape project.

Alicia said the County plans to submit an ATP application for a safe routes to school project in Covelo. She said she attended a recent Round Valley MAC meeting and received some public input.

Tim said the City of Ukiah was considering applying for an ATP grant to extend the rail trail from the northern city limits all the way to Redwood Valley, noting they would need to talk to the County since the entire segment is outside the city limits. He said they were excited about a possible application until the recent unfortunate ruling from the Surface Transportation Board that puts the whole rail trail in question and gives a lot of power to the skunk train and possible coal train. He’s now not sure if it

would be worth applying to put the trail on top of the rail, which he feels would be fought. Nephele agreed it would likely be an uphill battle, and thought maybe a future application could be considered after the issues have been worked through.

Tim said the City is now considering whether to put their phase 4 trail (to Plant Road) on or off the ballast, and may be talking to Senator McGuire's office about how to proceed. Nephele expressed hope now that the Great Redwood Trail Agency is in existence and has staffing from the Coastal Commission that they may be able to help with some of these issues.

*11:02 a.m. (approx) - Nephele left for another meeting.*

7c. Local Road Safety Plans (LRSP) - Update – Loretta advised that three of the four city councils have received presentations from TJKM on the Local Road Safety Plans, and a presentation is scheduled for Ukiah at tonight's City Council meeting. She noted the County is not having a presentation, but plans to put their LRSP on a consent calendar. Loretta said it appears that agencies are just receiving the informational presentations, with action on the final plans to be scheduled at follow-up meetings. Loretta noted this project is due to wrap up by end of June.

7d. Regional Early Action Plan (REAP) Grants – Update - Loretta encouraged agencies to continue working on required tasks, and submit invoices as soon as possible.

7e. Mobility Solutions for Rural Communities of Inland Mendo. Co. Feasibility Study – Update  
Loretta advised that the consultant firm of Amma Transit Planning, Inc. was selected (in a second RFP cycle) to perform this Caltrans grant-funded study, and a kick-off meeting is scheduled for this afternoon. She said this feasibility study will look at non-traditional mobility solutions in the hard-to-serve rural communities of Hopland, Potter Valley, Covelo, Laytonville, and Brooktrails. Planning will soon be starting to form the Technical Advisory Group (TAG), and some TAC members may be invited to participate on the TAG.

**8. Miscellaneous**

8a. Next Meeting – 6/15/22 (*if needed*)

**9. Adjournment** – 11:06 a.m. (*approx.*)

Respectfully Submitted,

Loretta Ellard  
Deputy Planner
