Subject: Emergency preparedness plan RE: Identified evacuation areas and the need for more fire cameras.

I own and operate Ocean Ridge Airport at 37691 Old stage Road in Gualala. It has been identified as an evacuation area on the ridge because of vast open areas associated with the airport. Please consider it as an alternative emergency safe zone, if other routes and locations may be blocked.

Why are there no fire cameras covering The Sea Ranch and the South Mendocino Coast? It seems as though all of South Western Mendocino county and the North West Sonoma county have been avoided. With quick fire detection a necessity, these areas must be covered. Please look at the actual coverage available on "firecamera.com"

Suggestions: 1.Sea Ranch tower. and The Gualala Point Park.
2. The old 776 Air Base near Point arena.
